### Timeline for Academic Units

Please see the implementation status of scheduled academic units on the [MiWorkspace Project Site](https://miworkspace.it.umich.edu/learn). See an overview of implementation phases.

### Sept/Oct Key Milestones

- Continuing faculty migrations at College of Pharmacy; Ford School of Public Policy; School of Music, Theatre & Dance; and School of Natural Resources and Environment
- Taubman College is planning for faculty migrations to begin later this fall
- U-M School of Information is in stabilization
- Pre-discovery continues for School of Dentistry
- Pre-discovery in U-M Transportation Research Institute (UMTRI) is complete
- Mobility Transformation Center (MTC) is in technical discovery
- Health Management Research Center (HMRC) is now defining a plan to migrate their 50 users in early 2016
- Digital Education & Innovation (DEI) and Student Publications on hold pending further financial clarification
- MCubed has begun leadership engagement activities to define a roll-out strategy
- Ross School of Business has put a hold on remaining migrations
- Conversations continue between ITS and leadership in the College of Engineering; Law School; Life Sciences Institute; LSA; and School of Public Health

### Upcoming Milestones

- Mobility Transformation Center (MTC) is on track to migrate its staff in mid-October
- School of Nursing is on track to begin planning this fall for migration activities in April 2016

### Questions, Issues, or Updates

- DEI, Ross School of Business, and Student Publications are requesting further clarification on the funding model and financial expectation before moving forward

### Project Stories & Quotes

- SMTD faculty continue to migrate to the service, many with great enthusiasm, as the quotes below attest:
  
  “My new computer looks great. Thanks for your help.”
  “This was painless and easy to do with your help.”
  “The changes to updating and printing are welcome changes.”

### Operational Updates

- Supporting 15,185 total people; 9,295 regular and 5,890 temporary staff members on 12,967 devices — 9,812 dedicated and 3,155 shared devices—including 10,369 Windows and 2,571 Macintosh machines (September 2015 data)
- Operations staff and engineers have been testing and communicating to customers about the upcoming upgrades for Macs (El Capitan OS) and Windows (Internet Explorer 11).
